VOLUME CONTENTS

January, Number 1

	1	Editorial
I. TANASAWA, S. NISHIO and K. SUZUKI	3	Heat transfer bibliography—Japanese works 1997
P. G. Q. NETTO and R. I. L. GUTHRIE	21	The importance of turbulence modelling in the design of a novel delivery system for a single-belt steel casting process
R. ROMERO-MÉNDEZ, M. SEN, K. T. YANG and R. MCCLAIN	39	Effect of fin spacing on convection in a plate fin and tube heat exchanger
N. O. MORAGA and E. E. MEDINA	53	Conjugate forced convection and heat conduction with freezing of water content in a plate shaped food
H. I. ANDERSSON, J. B. AARSETH and B. S. DANDAPAT	69	Heat transfer in a liquid film on an unsteady stretching surface
L. H. CHAI, X. F. PENG and B. X. WANG	75	Nonlinear aspects of boiling systems and a new method for predicting the pool nucleate boiling heat transfer
J. JIANG, Y. X. TAO and L. BYRD	85	Evaporative heat transfer from thin liquid film on a heated cylinder
A. VERMA and M. A. JOG	101	Plasma flow over an array of particles
T. S. FISHER and K. E. TORRANCE	113	Constrained optimal duct shapes for conjugate laminar forced convection
A. V. FILIPPOV and D. E. ROSNER	127	Energy transfer between an aerosol particle and gas at high temperature ratios in the Knudsen transition regime
M. NICKOLAY, C. CRAMER and H. MARTIN	139	Analytical solution for the potential flow through the wall of n-sided hollow cylinders of regular polygonal cross-section
G. FABBRI	147	Effect of disuniformities in vapor saturation pressure and coolant velocity on vapor back flow phenomena in single-pass air-cooled condensers
	161	Letters to the Editors
Announcement		
	165	The Second International Conference on Engineering Computational Technology, Leuven, Belgium, 6–8 September 2000

January, Number 2

W. Chen and R. N. Christensen	167	Inlet subcooling effect on heat and mass transfer characteristics in a laminar film flow
F. B. Campos and P. L. C. Lage	179	Simultaneous heat and mass transfer during the ascension of superheated bubbles
J. V. C. Vargas, J. C. Ordóñez and A. Bejan	191	Power extraction from a hot stream in the presence of phase change
C. Yang, Y. Wu, X. Yuan and C. Ma	203	Study on bubble dynamics for pool nucleate boiling
M. Choi and K. Cho	209	Liquid cooling for a multichip module using Fluorinert liquid and paraffin slurry
Z.-G. Feng and E. E. Michaelides	219	A numerical study on the transient heat transfer from a sphere at high Reynolds and Peclet numbers
Y. Ju, G. Masuya, F. Liu, Y. Hattori and D. Riechelmann	231	Asymptotic analysis of radiation extinction of stretched premixed flames
S. J. Ha and H. C. No	241	A dry-spot model of critical heat flux applicable to both pool boiling and subcooled forced convection boiling
A. B. Turner, S. E. Hubbe-Walker and F. J. Bayley	251	Fluid flow and heat transfer over straight and curved rough surfaces
P. S. Wei, Y. K. Kuo, S. H. Chiu and C. Y. Ho	263	Shape of a pore trapped in solid during solidification
Z. Zhao, S. Glod and D. Poulikakos	281	Pressure and power generation during explosive vaporization on a thin-film microheater
A. M. H. Brooker, J. C. Patterson, T. Graham and W. Schöpf	297	Convective instability in a time-dependent buoyancy driven boundary layer
H. Tan, L. Ruan and T. W. Tong	311	Temperature response in absorbing, isotropic scattering medium caused by laser pulse
Technical Notes		
M. Epstein and J. P. Burelbach	321	Transient vertical mixing by natural convection in a wide layer
Y. Demirel, R. N. Sharma and H. H. Al-Ali	327	On the effective heat transfer parameters in a packed bed

February, Number 3

T. Hirata, K. Nagasaka and M. Ishikawa — 333 Crystal ice formation of solution and its removal phenomena at cooled horizontal solid surfaces Part I: ice removal phenomena

F.-B. Weng, Y. Kamotani and S. Ostrach — 341 Numerical analysis of solutal convection in rotating shallow electrochemical cells

Qu Weilin, Gh. M. Mala and Li Dongqing — 353 Pressure-driven water flows in trapezoidal silicon microchannels

L. Wang — 365 Solution structure of hyperbolic heat-conduction equation

E. P. Volchkov, V. P. Lebedev, V. I. Terekhov and N. E. Shishkin — 375 An experimental study of the flow stabilization in a channel with a swirled periphery jet

M. Gonzalez — 387 Asymptotic evolution of a passive scalar field advected by an homogeneous turbulent shear flow

A. G. Fedorov and R. Viskanta — 399 Three-dimensional conjugate heat transfer in the micro-channel heat sink for electronic packaging

Y. Chen, M. Fiebig and N. K. Mitra — 417 Heat transfer enhancement of finned oval tubes with staggered punched longitudinal vortex generators

C. Allibert, Ph. Marty, A. Gagnoud and Y. Fautrelle — 437 Estimate of the diffusion coefficient in Co based liquids

W. T. Konka — 447 Natural convection heat transfer around horizontal tube in vertical slot

H. Iwai, K. Nakabe and K. Suzuki — 457 Flow and heat transfer characteristics of backward-facing step laminar flow in a rectangular duct

H. Iwai, K. Nakabe, K. Suzuki and K. Matsubara — 473 The effects of duct inclination angle on laminar mixed convective flows over a backward-facing step

Technical Note

H.-M. Yeh, C.-D. Ho and W.-S. Sheu — 487 Double-pass heat or mass transfer through a parallel-plate channel with recycle

February, Number 4

C. Pozrikidis — 493 Conductive mass transport from a semi-infinite lattice of particles

A. Gopinath and D. R. Harder — 505 An experimental study of heat transfer from a cylinder in low-amplitude zero-mean oscillatory flows

J. D. CHUNG and M. KAVIANY 521 Effects of phonon pore scattering and pore randomness on effective conductivity of porous silicon

A. Z. ŞAHIN 539 Effective thermal conductivity of frost during the crystal growth period

J. LEE and S.-J. LEE 555 The effect of nozzle aspect ratio on stagnation region heat transfer characteristics of elliptic impinging jet

R. G. M. VAN DER SMAN, M. H. ERNST and A. C. BERKENBOSCH 577 Lattice Boltzmann scheme for cooling of packed cut flowers

X. NICOLAS, J.-M. LUIJKX and J.-K. PLATTEN 589 Linear stability of mixed convection flows in horizontal rectangular channels of finite transversal extension heated from below

J. H. MERKIN and I. POP 611 Free convection near a stagnation point in a porous medium resulting from an oscillatory wall temperature

A. R. KACIMOV and Yu. V. OBNOSOV 623 Conduction through a grooved surface and Sierpinsky fractals

V. V. LEVDANSKY, J. SMOLIK and P. MORAVEC 629 Trapping of impurity molecules in condensation from mixtures of gases

Technical Notes

K. CHIDA 639 Surface temperature of a flat plate of finite thickness under conjugate laminar forced convection heat transfer condition

X. D. CHEN, P. CHEN and K. W. FREE 643 Experimental results of the time to the onset of ice formation at metal surface and a correlation based on a sub-layer reactor model

March, Number 5

W.-B. LOR and H.-S. CHU 653 Effect of interface thermal resistance on heat transfer in a composite medium using the thermal wave model

K.-C. CHANG and M.-J. SHYU 665 Revisiting the Reynolds-averaged energy equation in near-wall turbulence models

C. J. VREEMAN, M. J. M. KRANE and F. P. INCROPERA 677 The effect of free-floating dendrites and convection on macrosegregation in direct chill cast aluminum alloys Part I: model development

C. J. VREEMAN and F. P. INCROPERA 687 The effect of free-floating dendrites and convection on macrosegregation in direct chill cast aluminum alloys Part II: predictions for Al–Cu and Al–Mg alloys

P. VADASZ 705 Subcritical transitions to chaos and hysteresis in a fluid layer heated from below

A. BARLETTA and B. PULVIRENTI 725 Forced convection with slug flow and viscous dissipation in a rectangular duct

G. L. MORINI 741 Analytical determination of the temperature distribution and Nusselt numbers in rectangular ducts with constant axial heat flux

T. HIRATA, M. KATO, K. NAGASAKA and M. ISHIKAWA 757 Crystal ice formation of solution and its removal phenomena at cooled horizontal solid surface Part II: onset of ice removal condition

A. YILMAZ, O. BÜYÜKALACA and T. YILMAZ 767 Optimum shape and dimensions of ducts for convective heat transfer in laminar flow at constant wall temperature

M. SWEETLAND and J. H. LIENHARD V 777 Evaporative cooling of continuously drawn glass fibers by water sprays

F. BOIZUMAULT, S. HARMAND and B. DESMET 791 Echange thermique convectif local dans la zone de recirculation en aval d'une marche

W. KAST and C.-R. HOHENTHANNER 807 Mass transfer within the gas-phase of porous media

C. E. KWAK and T. H. SONG 825 Natural convection around horizontal downward-facing plate with rectangular grooves: experiments and numerical simulations

J.-M. LI, B.-X. WANG and X.-F. PENG 839 'Wall-adjacent layer' analysis for developed-flow laminar heat transfer of gases in microchannels

March, Number 6

Y. S. TIAN and T. G. KARAYIANNIS 849 Low turbulence natural convection in an air filled square cavity
Part I: the thermal and fluid flow fields

Y. S. TIAN and T. G. KARAYIANNIS 867 Low turbulence natural convection in an air filled square cavity
Part II: the turbulence quantities

W.-J. LUO and R.-J. YANG 885 Flow bifurcation and heat transfer in a spherical gap

D. K. TAFTI, G. WANG and W. LIN 901 Flow transition in a multilouvered fin array

R. VANCE and I. S. WICHMAN 921 Heat transfer analysis of a diffusion flame leading edge near a cold, chemically inert surface

P. S. CUMBER 935 Ray effect mitigation in jet fire radiation modelling

K. J. HAMMAD 945 The effect of hydrodynamic conditions on heat transfer in a complex viscoplastic flow field

V. TIMCHENKO, P. Y. P. CHEN, E. LEONARDI, G. DE VAHL DAVIS and R. ABBASCHIAN 963 A computational study of transient plane front solidification of alloys in a Bridgman apparatus under microgravity conditions

J. YAMADA and Y. KUROSAKI 981 Radiative characteristics of fibers with a large size parameter

F. A. JABERI and F. MASHAYEK 993 Temperature decay in two-phase turbulent flows

C. P. TSO and S. P. MAHULIKAR 1007 Combined evaporating meniscus-driven convection and radiation in annular microchannels for electronics cooling application

D. AGBLE and M. A. MENDES-TATSIS 1025 The effect of surfactants on interfacial mass transfer in binary liquid–liquid systems

C. M. ELLWOOD and W. J. KORCHINSKY 1035 The heating, by viscous dissipation, of liquids flowing across an enclosed rotating disc

Announcement

1051 5th International Symposium on Heat Transfer, Beijing, China, 12–16 August 2000

April, Number 7

N. NIGRO, A. HUESPE and V. FACHINOTTI 1053 Phasewise numerical integration of finite element method applied to solidification processes

B. ZHENG, C. X. LIN and M. A. EBADIAN 1067 Combined laminar forced convection and thermal radiation in a helical pipe

J. XU and T. CHEN 1079 Acoustic wave prediction in flowing steam–water two-phase mixture

Q. LIAO and T. S. ZHAO 1089 A visual study of phase-change heat transfer in a two-dimensional porous structure with a partial heating boundary

A. A. BUSEDRA and H. M. SOLIMAN 1103 Experimental investigation of laminar mixed convection in an inclined semicircular duct under buoyancy assisted and opposed conditions

D. M. FONTANA, M. CORCIONE, A. LO MONACO and L. SANTARPIA 1113 Laminar free convection from a vertical plate in partly dissociated gases

A. POZZI and R. TOGNACCINI 1121 Coupling of conduction and convection past an impulsively started semi-infinite flat plate

L. A. Brignoni and S. V. Garimella 1133 Effects of nozzle-inlet chamfering on pressure drop and heat transfer in confined air jet impingement

T. S. Zhao and Q. Liao 1141 On capillary-driven flow and phase-change heat transfer in a porous structure heated by a finned surface: measurements and modeling

G. S. Zhu and S. K. Aggarwal 1157 Transient supercritical droplet evaporation with emphasis on the effects of equation of state

W. Luan, B. D. Bowen, C. J. Lim, C. M. H. Brereton and J. R. Grace 1173 Suspension-to-membrane-wall heat transfer in a circulating fluidized bed combustor

F. Lemoine, Y. Antoine, M. Wolff and M. Lebouche 1187 Some experimental investigations on the concentration variance and its dissipation rate in a grid generated turbulent flow

W. W. Lin, J. C. Yang and D. J. Lee 1201 Relative stability of subcooled flow boiling on non-uniformly heated, inclined flat surface

M. Pettersson and S. Stenström 1209 Modelling of an electric IR heater at transient and steady state conditions Part I: model and validation

M. Pettersson and S. Stenström 1223 Modelling of an electric IR heater at transient and steady state conditions Part II: modelling a paper dryer

S. H. Kim and K. Y. Huh 1233 A new angular discretization scheme of the finite volume method for 3-D radiative heat transfer in absorbing, emitting and anisotropically scattering media

A. Murata and S. Mochizuki 1243 Large eddy simulation with a dynamic subgrid-scale model of turbulent heat transfer in an orthogonally rotating rectangular duct with transverse rib turbulators

C.-Y. Yang 1261 Determination of the temperature dependent thermophysical properties from temperature responses measured at medium's boundaries

Announcement

1271 Call for nominations — the Nusselt–Reynolds Prize

April, Number 8

E. R. G. Eckert, R. J. Goldstein, W. E. Ibele, T. W. Simon, T. H. Kuehn, P. J. Strykowski, K. K. Tamma, A. Bar-Cohen, J. V. R. Heberlein, J. H. Davidson, J. Bischof, F. Kulacki and U. Kortshagen 1273 Heat transfer — a review of 1996 literature

K. A. R. Ismail and V. L. Scalon 1373 A finite element free convection model for the side wall heated cavity

B.-X. Wang and X.-Z. Du 1391 Condensation on the outside surface of a small/mini diameter tube for vapor flowing through a horizontal annulus surround by an adiabatic concentric tube

S. Aravinth 1399 Prediction of heat and mass transfer for fully developed turbulent fluid flow through tubes

J. C. Rozzi, F. E. Pfefferkorn, F. P. Incropera and Y. C. Shin 1409 Transient, three-dimensional heat transfer model for the laser assisted machining of silicon nitride: I. Comparison of predictions with measured surface temperature histories

J. C. Rozzi, F. P. Incropera and Y. C. Shin 1425 Transient, three-dimensional heat transfer model for the laser assisted machining of silicon nitride: II. Assessment of parametric effects

G. H. Rhee and H. J. Sung 1439 A nonlinear low-Reynolds number heat transfer model for turbulent separated and reattaching flows

W. N. Kim, H. S. Kwak and J. M. Hyun 1449 Buoyant heat transfer in a rotating cup-like cavity

H. Yoo 1457 Analytical solutions to the unsteady close-contact melting on a flat plate

A. Z. Şahin 1469 Entropy generation in turbulent liquid flow through a smooth duct subjected to constant wall temperature

Y. Chen, D. E. Nikitopoulos, R. Hibbs, S. Acharya and T. A. Myrum 1479 Detailed mass transfer distribution in a ribbed coolant passage with a 180° bend

May, Number 9

O. G. Martynenko 1493 Heat and mass transfer bibliography — CIS works

A. Mahidjiba, M. Mamou and P. Vasseur 1505 Onset of double-diffusive convection in a rectangular porous cavity subject to mixed boundary conditions

H. Van Santen, C. R. Kleijn and H. E. A. Van Den Akker 1523 Mixed convection in radial flow between horizontal plates — I. Numerical simulations

H. Van Santen, C. R. Kleijn and H. E. A. Van Den Akker 1537 Mixed convection in radial flow between horizontal plates—II. Experiments

T. J. Snyder and J. N. Chung 1547 Terrestrial and microgravity boiling heat transfer in a dielectrophoretic force field

T.-H. Hsu and S.-G. Wang	1563	Mixed convection of micropolar fluids in a cavity
I. Kataoka, M. Ishii and A. Nakayama	1573	Entrainment and desposition rates of droplets in annular two-phase flow
M. Sugawara and T. F. Irvine	1591	The effect of concentration gradient on the melting of a horizontal ice plate from above
H.-C. Chen, Y.-J. Jang and J.-C. Han	1603	Computation of heat transfer in rotating two-pass square channels by a second-moment closure model
C. Mackie	1617	Convective stability of a particle-laden fluid system in the presence of solidification
W. W. Lin, J. C. Yang and D. J. Lee	1629	Metastable pin fin boiling
E. Blums and S. Odenbach	1637	Thermophoretic separation of ultrafine particles in ferrofluids in thermal diffusion column under the effect of an MHD convection
W.-M. Yan and P.-J. Sheen	1651	Heat transfer and friction characteristics of fin-and-tube heat exchangers
L. A. Dombrovsky	1661	Thermal radiation from nonisothermal spherical particles of a semitransparent material
Technical Note		
H. Fujimoto, H. Shiraishi and N. Hatta	1673	Evolution of liquid/solid contact area of a drop impinging on a solid surface

May, Number 10

Z. B. Hou and R. Komanduri	1679	General solutions for stationary/moving plane heat source problems in manufacturing and tribology
M. J. Yu, S. W. Baek and J. H. Park	1699	An extension of the weighted sum of gray gases non-gray gas radiation model to a two phase mixture of non-gray gas with particles
P. Vadasz and S. Olek	1715	Convergence and accuracy of Adomian's decomposition method for the solution of Lorenz equations
S. J. Kim, D. Kim and D. Y. Lee	1735	On the local thermal equilibrium in microchannel heat sinks
Y. Na and T. J. Hanratty	1749	Limiting behavior of turbulent scalar transport close to a wall
Ch. Karcher, R. Schaller, Th. Boeck, Ch. Metzner and A. Thess	1759	Turbulent heat transfer in liquid iron during electron beam evaporation

H. M. PARK and T. Y. YOON 1767 Solution of the inverse radiation problem using a conjugate gradient method

A. SHABBIR and D. B. TAULBEE 1777 Experimental balances for the second moments for a buoyant plume and their implication on turbulence modeling

J. P. SCHWARTZE and S. BRÖCKER 1791 The evaporation of water into air of different humidities and the inversion temperature phenomenon

E. P. KERAMIDA, H. H. LIAKOS, M. A. FOUNTI, A. G. BOUDOUVIS and N. C. MARKATOS 1801 Radiative heat transfer in natural gas-fired furnaces

M. CHOI, H. S. YOO, G. YANG, J. S. LEE and D. K. SOHN 1811 Measurements of impinging jet flow and heat transfer on a semi-circular concave surface

C. H. DRIESEN, J. G. M. KUERTEN and H. K. KUIKEN 1823 Mass transport in a partially covered fluid-filled cavity

C. P. TSO and S. P. MAHULIKAR 1837 Experimental verification of the role of Brinkman number in microchannels using local parameters

W. K. CHO and D. H. CHOI 1851 Optimization of a horizontal MOCVD reactor for uniform epitaxial layer growth

B.-X. WANG and X.-Z. DU 1859 Study on laminar film-wise condensation for vapor flow in an inclined small/mini-diameter tube

Technical Note

C.-C. WANG, Y.-T. LIN and C.-J. LEE 1869 An airside correlation for plain fin-and-tube heat exchangers in wet conditions

June, Number 11

A. J. WHITE and M. J. HOUNSLOW 1873 Modelling droplet size distributions in polydispersed wet-steam flows

C.-P. YIN, Y.-Y. YAN, T.-F. LIN and B.-C. YANG 1885 Subcooled flow boiling heat transfer of R-134a and bubble characteristics in a horizontal annular duct

B. X. WANG, J. T. ZHANG and X. F. PENG 1897 Experimental study on the dryout heat flux of falling liquid film

J. E. SIMPSON and S. V. GARIMELLA 1905 The influence of gravity levels on the horizontal Bridgman crystal growth of an alloy

A. F. COKMEZ-TUZLA, K. TUZLA and J. C. CHEN 1925 Characteristics of liquid–wall contact in post-CHF flow boiling

H. KAWAMURA and Y. KURIHARA 1935 Modelling of turbulent scalar transport in homogeneous turbulence

F. MOUKALLED, A. DOUGHAN and S. ACHARYA 1947 Parametric study of mixed convection in channels with concave and convex surfaces

C. C. PASCUAL, J. H. STROMBERGER, S. M. JETER and S. I. ABDEL-KHALIK 1965 An empirical correlation for electrohydrodynamic enhancement of natural convection

C. S. MCDANIEL and B. W. WEBB 1975 Slot jet impingement heat transfer from circular cylinders

C.-W. LAN 1987 Effects of axial vibration on vertical zone-melting processing

H. GJERKEŠ and I. GOLOBIČ 1999 Pool boiling CHF on a laser heated thin plate

C.-Y. WU and S.-H. WU 2009 Integral equation formulation for transient radiative transfer in an anisotropically scattering medium

M. A. AL-NIMR and V. S. ARPACI 2021 The thermal behavior of thin metal films in the hyperbolic two-step model

E. I. VITKIN, S. L. SHURALYOV and V. V. TAMANOVICH 2029 Engineering procedure for calculating the transfer of the selective radiation of molecular gases

Technical Notes

V. R. VOLLER 2047 A model of microsegregation during binary alloy solidification

Z. TAMAINOT-TELTO and R. E. CRITOPH 2053 Thermophysical properties of monolithic carbon

June, Number 12

A. J. SLAVIN, F. A. LONDRY and J. HARRISON 2059 A new model for the effective thermal conductivity of packed beds of solid spheroids: alumina in helium between 100 and 500°C

X. ZHOU, Z. SUN, G. BRENNER and F. DURST 2075 Combustion modeling of turbulent jet diffusion H_2/air flame with detailed chemistry

A. C. BAYTAŞ 2089 Entropy generation for natural convection in an inclined porous cavity

A. BEJAN and M. ALMOGBEL 2101 Constructal T-shaped fins

G. D. MCBAIN, H. SUEHRCKE and J. A. HARRIS 2117 Evaporation from an open cylinder

C.-C. NI and J.-Y. SAN 2129 Mass diffusion in a spherical microporous particle with thermal effect and gas-side mass transfer resistance

Q. ZHANG, T. H. JACKSON and A. UNGAN 2141 Numerical modeling of microwave induced natural convection

J.-J. CHEN and J.-D. LIN 2155 Thermocapillary effect on drying of a polymer solution under non-uniform radiant heating

G. GUTIERREZ and T.-C. JEN 2177 Numerical simulation of non-linear heat conduction subjected to a laser source: the effects of variable thermal properties

M. MANN, K. STEPHAN and P. STEPHAN 2193 Influence of heat conduction in the wall on nucleate boiling heat transfer

C. LE NILIOT, F. RIGOLLET and D. PETIT 2205 An experimental identification of line heat sources in a diffusive system using the boundary element method

J. H. SONG and M. ISHII 2221 The well-posedness of incompressible one-dimensional two-fluid model

Technical Notes
